Summary

Fourth-year Business Information Systems student with sales training in a car showroom and a solid technical background from iAcademy: Software Engineering completed, Frontend and Data Analysis nearly done, Backend in progress. I understand programming from the inside, so I can explain the value of tech and education programs clearly and honestly. Looking to start my career in sales at a technology or education company.

Work Experience

Sales Trainee | Car Showroom | 3 months

- Trained on the showroom floor and supported the team in dealing with walk-in customers
- Learned to present car features and answer customer questions clearly
- Built communication and customer-service skills in a real sales environment

Projects

University Payment Queue System (Web Application)
Web platform that helps universities reduce payment queues by letting students book turns and pay online.

Car Wash and Maintenance Booking System (Web Application)
Booking platform where customers reserve appointments before visiting for washing or maintenance, and view all data related to their car.

ATM Fault Prediction (Data Analysis)
Predictive analysis project that detects ATMs likely to fail, so banks can act and replace machines in time.

Skills

Sales: Customer communication, customer service, product presentation, negotiation (basic)
Technical: Frontend Development, Software Engineering, Data Analysis, Backend Development (in progress)
